

GE Security

GE Security is a world leader in the manufacture of fibre optic and UTP transmission products for the Security, Broadcast, Industrial and Transportation industries.

The range of products feature innovative technology to simplify the installation process and allow the health of a system to be monitored by the use of on-screen diagnostics coupled with built-in test functions for data and audio circuits.

A large range of products can be supplied from the simple point-to-point link through to high order video, audio and data multiplexers.

Fibre Transmission

- Transmit video up to 66km on singlemode fibre.
- Send Video, Audio, Data & Contact Closure.
- Multiprotocol data.
- Rack configurable, only buy what you need.
- Drastically reduces service calls with AGC.
- Environmentally hardened temperature rating.
- 5 year warranty.

UTP Transmission

- Transmit video up to 1000m on Cat 5 cable.
- Superior video quality.
- Increased performance over existing UTP installations.
- Rack configurable, only buy what you need.
- Compatible with any manufacturers passive devices (Balun).
- Drastically reduces service calls with AGC.
- Environmentally hardened temperature rating.
- Can make use of existing copper infrastructure.
- Lifetime warranty.

Ethernet Transmission

- Transmit 10/100/1000 Ethernet.
- Wide range of options available.
- IEEE 802.3 compliant.
- Environmentally hardened temperature rating.
- Lifetime warranty.
